Preface

Castle Field Target Air Rifle Club prides itself with an unblemished safety record spanning more than 20 years. Please be aware that the general public do NOT share your enthusiasm for air gun shooting. Always remember that you are an ambassador for your sport and represent all of us in your actions.

Safety

Safety with any type of firearm is everyone's responsibility. Shooting is one of the safest of all sports. The reason for this is that there are safety rules that MUST be observed at all times. The three fundamental rules are:

Always ensure the air weapon is pointing in a safe direction, preferably at the ground.

Never point a gun at anyone.

Always treat a gun as if it is loaded.

The other rules derive from the application of these fundamental rules in different circumstances.

Safe Handling of Guns

- 1 When you get out your gun, check that it is not cocked or loaded.
- 2 When handing a weapon to another person, always show that it is unloaded. Remember; it is better to check your gun is not loaded 100 times too often than once not enough.
- 3 When you put your gun away check it is not loaded or cocked. Never put a gun away loaded.
- 4 When you are handed a gun, first check that it is not loaded or cocked. If you are unfamiliar with the weapon ask the owner how to do this.
- 5 Never pick up a gun without permission from the owner
- 6 Air weapons should be stored out of sight and separately from pellets.
- 7 Air weapons should be covered when transporting them, in a gun slip for example.

Operating the Gun

- Always keep the gun pointing downrange when in use.
- Only load the gun with it pointing downrange.
- Never load an air gun until you are ready to fire it.
- When using break barrel or under-lever rifles, where the breach could snap shut on your fingers, always keep a hold of the barrel/cocking lever while loading.

Moving Around with Guns

- Never move between lanes with a loaded gun.
- When moving between lanes, open the breach and remove any magazine from the gun.
- While carrying a gun it must not be cocked, the breach should be open, the magazine removed and the gun carried vertically.
- Keep your gun in a case when not in use.

Range Commands

- If you hear a single note on a whistle or the command STOP, stop immediately. Unshoulder the weapon. If loaded, the weapon should be discharged into the ground in front of you or the breach opened. You must not be in any position to fire.

- Always obey instructions from the range officials immediately.
- Never go forward of the firing line without permission from the range official.

General

- Don't rely on safety catches to keep you or your companions safe.
- Don't try to attract someone's attention when they are shooting as it may cause them to turn around.
- Observe all the safety rules even when dry firing.
- Air weapons must not be stored where unauthorised people, particularly young people under the age of 18 might gain access to them.

Safety with Compressed Air

Many modern air weapons use compressed air as a power source. It provides convenient and effortless shooting, but we must never underestimate the amount of energy that is stored inside a cylinder.

A compressed air cylinder is a potential bomb if handled incorrectly.

- Store bottles away from sources of heat.
- Take great care not to drop bottles and avoid hard knocks to **any** compressed air cylinder.
- Do not use any bottle or fittings that appear worn or damaged.
- Always check the charge rating of unknown bottles and cylinders.
- Ensure that your bottle is in test
- When tightening bottle fittings use a minimum of force. Hand tight is generally enough.
- While charging buddy bottles and other removable cylinders, never stand in front of the bottle as it is charged.
- Always keep control of bottles and hoses while charging.
- Avoid looking directly at gauges as you fill air cylinders.
- Always charge your gun slowly.
- Don't put full *test* pressure into the gun, only working pressure.
- Avoid contact between skin and high pressure air systems.
- Avoid getting oils and greases in the high pressure system.
- Never drill into pressure bottles for any reason, it invalidates the unit's test.

Safety with CO² Cartridges

CO² cartridges provide a convenient a convenient power source for modern air rifle and pistols. However, they require special care in operation in addition to the normal safety rules.

In the club room

- Do not load magazines
- Do not install CO² capsules.

On the firing line

- When installing a CO² capsule the gun must point downrange
- When installing a magazine the gun must point downrange.
- While exhausting spent CO² capsules the gun must point downrange.
- Take care while handling exhausted CO² capsules as they become very cold.

Before leaving the firing range

- Remove and empty the magazine
- Remove the CO² cartridge and place the gun in its case.

The Law

Shooting differs from all other sports in one major respect. It is the only sport that is covered directly by Criminal Law. All other sports have rules, regulations and safety guidelines that are considered “best practice.” i.e. the best way of doing things. Shooting also has these guidelines for best practice, but has a legal requirement as well that is enforced not only by governing bodies but also by the police and legal system.

All air weapons are classified as firearms under the law. As an air gun user, you must ensure that you know the law and keep within it. Failing to do so can carry serious penalties including heavy fines up to and including life imprisonment.

List of laws by which you must abide:

- It is an offence for a person in possession of an air weapon to fail to take reasonable precautions to prevent someone under the age of 18 from gaining unauthorised access to it.
- It is an offence for a person under the age of 18 to purchase or hire an air weapon or ammunition for an air weapon.
- It is an offence to sell, let on hire or make a gift of an air weapon or ammunition to a person under the age of 18.
- It is an offence for anyone under the age of 18 to have with them an air weapon or ammunition unless:
 - they are under the supervision of a person aged 21 or over; or
 - they are shooting as a member of an approved target shooting club; or
 - they are shooting at a shooting gallery and the only weapons being used are either air weapons or miniature rifles not exceeding .23 inch calibre; or
 - the person is 14 years old or above and is on private premises with the consent of the occupier.
- It is an offence to part with possession of an air weapon, or ammunition to a person under the age of 18 except under the circumstances mentioned above.
- It is an offence for any person shooting on private land, regardless of age, to use an air weapon for firing a pellet beyond the boundaries of the premises.
- It is an offence for a supervising adult to allow a person under the age of 18 to use an air weapon for firing a pellet beyond the boundaries of the premises.
- It is an offence to have an air weapon in a public place without a reasonable excuse.
- It is an offence to trespass with an air weapon, whether in a building or on land.
- It is an offence to have an air weapon if you are prohibited from possessing a firearm. Anyone that has been sentenced to a custodial sentence of between three months and three years is prohibited from possession of air weapons, other firearms and ammunition for five years from their date of release. Anyone who has been sentenced to three years or more is prohibited for life.
- It is an offence to fire an air weapon without lawful authority or excuse within 50 feet (15 metres) of the centre of a public road in such a way as to cause a road user to be injured, interrupted or endangered.
- It is an offence to intentionally or recklessly kill certain wild animals and birds. When shooting live quarry it is your responsibility to make sure that you only do so legally.
- It is an offence to knowingly cause a pet animal to suffer unnecessarily, which could be committed by shooting a pet animal.
- It is an offence to have an air weapon with intent to damage or to destroy property. It is also an offence to have air weapons and be reckless as to whether property would be damaged or destroyed.
- It is an offence to have an air weapon with intent to endanger life.

Licensing

The power of an air gun is measured in muzzle (or kinetic) energy. This is the energy at which the projectile leaves the muzzle of the gun.

You can purchase any air gun that does not exceed the UK maximum legal limit without a license.

Maximum UK legal limits are:

Pistol 6 ft/lbs (8.14 joules)

Rifle 12 ft/lbs (16.27 joules)

Generally all rifles and pistols sold in gun shops are below the legal limit. Those over the limit can only be purchased by first obtaining a Firearms Certificate from the Police. It is not possible to obtain a license for a pistol that exceeds 6 ft/lbs as they are now effectively banned.

It is the owners responsibility to ensure that their air weapons power falls below these limits. If you are unsure of your air guns power, most good gun shops and clubs will be able to check the power for you.
